### Profile

---

Senior Frontend Engineer with 4+ years of experience building scalable web applications across supply chain, security & surveillance, and customer engagement platforms. Experienced in React.js, Angular, Vue.js, and modern frontend architecture, with a strong focus on performance optimization, system scalability, and business-driven solutions. Proven track record of leading frontend initiatives, improving operational efficiency, and collaborating across cross-functional engineering teams.

### Professional Experience

---

#### Frontend II, Breadfast

04/2025 – Present  
Cairo , Egypt

- Played a key role within the **Supply Chain Engineering team**, developing and designing scalable systems for inventory management, demand forecasting, and supply planning to ensure data accuracy and operational reliability at scale.
- Designed and implemented **new system features** that optimized warehouse item organization and operational workflows, generating **monthly cost savings of ~1.5M EGP per warehouse** through automation and efficiency improvements.
- Collaborated cross-functionally with **Product Managers, Backend Engineers, and Operations teams**, translating complex business requirements into scalable, well-integrated technical solutions.
- Optimized **internal dashboard architecture** by refactoring core modules and improving state management, significantly reducing page load times and enhancing rendering performance.
- Led the migration of **legacy frontend applications from Vue.js to React.js**, improving code maintainability, component reusability, and overall application scalability
- Taking Frontend Technical Leadership at **Pricing Engineering Team** to maintain and enhance a product-matching system that detects similar products and calculates matching probability, improving product tracking accuracy and increasing product collection efficiency by **20 - 30% using AI**

**Tech stack:** React.  js,vue.js

#### Front-End Engineer, IOTBlue

11/2024 – 04/2025  
Cairo, Egypt

- Develop and maintain **scalable, high-performance front-end applications** using modern frameworks and best practices, contributing to features across the **full project lifecycle** from requirements analysis to deployment and support.
- Contribute as a team member to **Life-Streaming Project** , including **surveillance system improvements**, enhancing system usability, performance, and reliability through continuous development and optimization.
- Optimize **application performance** by improving load times, rendering efficiency, and responsiveness, applying profiling tools, code-splitting, and front-end performance optimization techniques.
- Work closely with **designers, backend engineers, and product managers**, ensuring smooth integration, timely delivery, and alignment with business and technical requirements.

**Tech stack:** React.js , Next.js

**Front-End Engineer, Gameball** 

12/2022 – 12/2024

Cairo, Egypt

- Developed **adaptive and responsive frontend features** for the Gameball platform, ensuring cross-browser compatibility and improved runtime performance across supported environments.
- Improved **application performance and maintainability** through targeted refactoring, architectural enhancements, and adherence to modern frontend best practices.
- Designed and implemented **scalable design systems** and established **robust project structures**, enabling consistency, reusability, and faster development for new initiatives.
- Optimized **application bundle size** by implementing **Webpack chunk splitting and build optimizations**, resulting in faster load times and improved overall application efficiency.
- Contributed to a **Gameball dashboard revamp**, to version 3 by modernizing UI components and functionality, and supporting the transition toward a fully updated and scalable frontend architecture
- Participated in **code reviews** to ensure code quality and consistency, while supporting and mentoring junior developers through constructive feedback.

**Tech stack:** Angular, React Js, vanilla JavaScript, webpack., TypeScript, Node.js,

**Junior Front-End Engineer, Turn Digital** 

03/2022 – 12/2022

Cairo, Egypt

- Designed, developed, and debugged web applications to ensure seamless functionality across diverse browsers and platforms.
- Led front-end development efforts, focusing on UI implementation and integration with back-end systems.

**Tech stack:** Vue js, React js

## Internships Experince

---

**Software Engineer, IGRC Sqaure**

12/2021 – 03/2022

Cairo, Egypt

- Developed and deployed the company website, ensuring functionality and performance optimization.
- Designed and implemented simple CRUD APIs using Node.js to manage data interactions for the website.

## Projects

---

**Breadfast Dashboard, React.js , Vue.js**

A centralized internal web platform used by operations, supply chain, and warehouse teams to manage and monitor daily business activities. The dashboard provides real-time visibility into inventory levels, supply and demand metrics, order fulfillment, warehouse operations, shopping , payment and mentoring . It integrates with multiple backend services to support data-driven decision-making, operational planning, and process optimization across warehouses and distribution center

**IOTBlue PSIM Platform, react.js**

solution offers real-time video surveillance unification, leveraging the Network Video Forwarding agent to enhance Network Address translation conflicts. Additionally, we provide a video gateway that seamlessly interprets streaming protocols such as RTSP, HLS, and WebRTC.

**Gameball Platform** [↗](#), *Angular*

Gameball is a comprehensive customer engagement and loyalty platform designed to help businesses enhance user retention, drive customer loyalty, and boost revenue. It offers a range of gamification tools, reward systems, and actionable analytics to create personalized customer experiences. By integrating seamlessly with various platforms, Gameball enables businesses to craft engaging loyalty programs, motivate users through challenges, and foster long-term relationships with their customers.

**Introduction-video** [↗](#)

**Gameball referral app**, *React Typescript*

The Gameball Referral App is a dedicated solution that streamlines referral programs by rewarding customers for bringing in new users. Designed for flexibility and scalability, it operates independently to enhance user acquisition through word-of-mouth marketing. This standalone app ensures seamless performance and easy integration for businesses.

**Awqaf Egypt** [↗](#), *Angular*

The Awqaf Egypt website is the official digital platform of the Ministry of Awqaf. It provides access to resources on Islamic teachings, prayer schedules, and scholarly works, along with updates on ministry projects and initiatives. The site aims to enhance community engagement, promote cultural awareness, and facilitate communication with the public. It serves as a hub for fostering transparency and delivering essential services efficiently.

**Usolloy** [↗](#), *React Javascript*

A Real Estate Management System designed to streamline property listing and rental processes. The platform enables property owners to effortlessly list and advertise their units while providing users with powerful search tools to find and rent available properties. With an intuitive user interface and robust functionality, it delivers a seamless experience for both property owners and renters, enhancing efficiency and accessibility.

**Skills**

---

**Accessibility**

Knowledge of accessibility guidelines and best practices for creating inclusive applications

**Problem-Solving**

Ability to identify and resolve complex technical challenges effectively

**Platform-Specific Features**

Experience in accessing native platform features through Frontend platform Stacks (Angular , React ,vue)

**Version Control**

Expertise in using Git or other version control systems for collaborative development

**Mentorship**

Experience mentoring junior developers and fostering a collaborative work environmen

**Adaptability**

Flexibility to adapt to changing requirements and technologic

**Technical Skills**

---

- **Frontend Frameworks & Libraries:** React.js, Vue.js, Angular, Next.js
- **Backend & Runtime:** Node.js, Express.js
- **State Management:** Redux, Zustand, Vuex, Context API
- **Build Tools & Bundlers:** Webpack, Vite, Babel, NPM, Yarn
- **Testing:** Jest, Vitest, React Testing Library, Playwright (End-to-End Testing)
- **API & Data Handling:** REST APIs, GraphQL, Axios, React Query/TanStack Query
- **Performance Optimization:** Code Splitting, Lazy Loading, Memoization, Tree Shaking, Rendering Optimization
- **Architecture & Practices:** Component-Based Architecture, Scalable Frontend Architecture, Microfrontends, Responsive Design, Cross-Browser Compatibility, Accessibility (a11y),
- **DevOps & Tools:** CI/CD Pipelines, Docker (Basics), Postman
